Subject index

Methods and constructs

Theoretical

Semiempirical methods

Complete parameterization, and invariance, of diffusive quantum trajectories for Markovian open systems, H.M. Wiseman and L. Diósi 268 (2001) 91

Photon states and statistics

Bistability and stochastic resonance in an open quantum system, T. Wellens and A. Buchleitner 268 (2001) 131

Scattering of waves and particles

Inelastic resonant tunneling with wavepackets, F. Grossmann 268 (2001) 347

Reactive molecular dynamics including dissipative processes

The real-time renormalization group approach for the spin-boson model in non-equilibrium, M. Keil and H. Schoeller 268 (2001) 11
Modeling of ultrafast electron-transfer dynamics: multi-level Redfield theory and validity of approximations, D. Egorova, A. Kühl and W. Domcke 268 (2001) 105
Perturbative treatment of intercenter coupling in the framework of Redfield theory, U. Kleinekathöfer, I. Kondov and M. Schreiber 268 (2001) 121
Semiclassical electron transfer: Zusman equations versus Langevin approach, I. Goychuk, L. Hartmann and P. Hänggi 268 (2001) 151
Electronic decoherence in condensed phases, D.M. Lockwood, H. Hwang and P.J. Rossky 268 (2001) 285
Quantum transition state theory for dissipative systems, J.-L. Liao and E. Pollak 268 (2001) 295

Intramolecular dynamics

Retardation effects in the dynamics of open molecular systems, T. Mančal and V. May 268 (2001) 201

Molecular dynamics of many particle systems and condensed phases

Quantum transition state theory for dissipative systems, J.-L. Liao and E. Pollak 268 (2001) 295

PII: S0301-0104(01)00377-9

Statistical computational methods (incl. Monte Carlo)
Complete parameterization, and invariance, of diffusive quantum trajectories for Markovian open systems, H.M. Wiseman and L. Diósi 268 (2001) 91
The Brownian motion stochastic Schrödinger equation, W.T. Strunz 268 (2001) 237
Non-Markovian quantum state diffusion, J.T. Stockburger and H. Grabert 268 (2001) 249
Quantum transition state theory for dissipative systems, J.-L. Liao and E. Pollak 268 (2001) 295

Fluctuations and random processes
From completely positive maps to the quantum Markovian semigroup master equation, D.A. Lidar, Z. Bihary and K.B. Whaley 268 (2001) 35
Energy gap dependence of vibrational dephasing rates in a bath: a semigroup description, D.M. Lockwood, M. Ratner and R. Kosloff 268 (2001) 55
Dissipation in anharmonic molecular systems: beyond the linear coupling limit, M. Nest and P. Saalfrank 268 (2001) 65
Complete parameterization, and invariance, of diffusive quantum trajectories for Markovian open systems, H.M. Wiseman and L. Diósi 268 (2001) 91
Bistability and stochastic resonance in an open quantum system, T. Wellens and A. Buchleitner 268 (2001) 131
Semiclassical electron transfer: Zusman equations versus Langevin approach, I. Goychuk, L. Hartmann and P. Hänggi 268 (2001) 151
Path-integral approach to a semiclassical stochastic description of quantum dissipative systems, J. Casado-Pascual, C. Denk, M. Morillo and R.I. Cukier 268 (2001) 165
Wiener–Hermite expansion formalism for the stochastic model of a driven quantum system, Y. Kayanuma and K.-i. Noba 268 (2001) 177
Non-Markovian homodyne-mediated feedback on a two-level atom: a quantum trajectory treatment, J. Wang, H.M. Wiseman and G.J. Milburn 268 (2001) 221
The Brownian motion stochastic Schrödinger equation, W.T. Strunz 268 (2001) 237
A uniqueness-theorem for "linear" thermal baths, P. Reimann 268 (2001) 337

Non-equilibrium statistical mechanics
Iterative path integral calculation of quantum correlation functions for dissipative systems, J. Shao and N. Makri 268 (2001) 1
The real-time renormalization group approach for the spin-boson model in non-equilibrium, M. Keil and H. Schoeller 268 (2001) 11
On the Bayesian approach to calculating time correlation functions in quantum systems; reaction dynamics and spectroscopy, G. Krilov, E. Sim and B.J. Berne 268 (2001) 21
Path-integral approach to a semiclassical stochastic description of quantum dissipative systems, J. Casado-Pascual, C. Denk, M. Morillo and R.I. Cukier 268 (2001) 165
Retardation effects in the dynamics of open molecular systems, T. Mančal and V. May 268 (2001) 201
Non-Markovian homodyne-mediated feedback on a two-level atom: a quantum trajectory treatment, J. Wang, H.M. Wiseman and G.J. Milburn 268 (2001) 221
The Brownian motion stochastic Schrödinger equation, W.T. Strunz 268 (2001) 237
Non-Markovian quantum state diffusion, J.T. Stockburger and H. Grabert 268 (2001) 249
Decoherence and dephasing in coupled Josephson-junction qubits, M. Governale, M. Grifoni and G. Schön 268 (2001) 273
Steady-state quantum mechanics of thermally relaxing systems, D. Segal and A. Nitzan 268 (2001) 315
A uniqueness-theorem for "linear" thermal baths, P. Reimann 268 (2001) 337

Objects

Bulk systems

Gases

Energy gap dependence of vibrational dephasing rates in a bath: a semigroup description, D.M. Lockwood, M. Ratner and R. Kosloff 268 (2001) 55

Liquids neat

A uniqueness-theorem for "linear" thermal baths, P. Reimann 268 (2001) 337

Liquid mixtures and solutions

Electronic decoherence in condensed phases, D.M. Lockwood, H. Hwang and P.J. Rossky 268 (2001) 285

Crystals

A uniqueness-theorem for "linear" thermal baths, P. Reimann 268 (2001) 337

Low-dimensional materials

Wiener–Hermite expansion formalism for the stochastic model of a driven quantum system, Y. Kayanuma and K.-i. Noba 268 (2001) 177

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)

Complete parameterization, and invariance, of diffusive quantum trajectories for Markovian open systems, H.M. Wiseman and L. Diósi 268 (2001) 91
Bistability and stochastic resonance in an open quantum system, T. Wellens and A. Buchleitner 268 (2001) 131
Semiclassical electron transfer: Zusman equations versus Langevin approach, I. Goychuk, L. Hartmann and P. Hänggi 268 (2001) 151
The Brownian motion stochastic Schrödinger equation, W.T. Strunz 268 (2001) 237
Non-Markovian quantum state diffusion, J.T. Stockburger and H. Grabert 268 (2001) 249
Quantum transition state theory for dissipative systems, J.-L. Liao and E. Pollak 268 (2001) 295
Steady-state quantum mechanics of thermally relaxing systems, D. Segal and A. Nitzan 268 (2001) 315

Molecules (neutral and ionic)

Perturbative treatment of intercenter coupling in the framework of Redfield theory, U. Kleinekathöfer, I. Kondov and M. Schreiber 268 (2001) 121
Retardation effects in the dynamics of open molecular systems, T. Mančal and V. May 268 (2001) 201

-other large

Modeling of ultrafast electron-transfer dynamics: multi-level Redfield theory and validity of approximations, D. Egorova, A. Kühl and W. Domcke 268 (2001) 105

Molecular aggregates
Perturbative treatment of intercenter coupling in the framework of Redfield theory, U. Kleinekathöfer, I. Kondov and M. Schreiber 268 (2001) 121

Defects and impurities
The real-time renormalization group approach for the spin-boson model in non-equilibrium, M. Keil and H. Schoeller 268 (2001) 11
Path-integral approach to a semiclassical stochastic description of quantum dissipative systems, J. Casado-Pascual, C. Denk, M. Morillo and R.I. Cukier 268 (2001) 165

Ions and charge carriers
Inelastic resonant tunneling with wavepackets, F. Grossmann 268 (2001) 347

Phenomena

Vibrations and rotations of molecules
Energy gap dependence of vibrational dephasing rates in a bath: a semigroup description, D.M. Lockwood, M. Ratner and R. Kosloff 268 (2001) 55

Coupling of electronic and nuclear motion
Subsystem dynamics in mixed quantum–classical systems, M. Toutounji and R. Kapral 268 (2001) 79
Semiclassical electron transfer: Zusman equations versus Langevin approach, I. Goychuk, L. Hartmann and P. Hänggi 268 (2001) 151
Path-integral approach to a semiclassical stochastic description of quantum dissipative systems, J. Casado-Pascual, C. Denk, M. Morillo and R.I. Cukier 268 (2001) 165
Semi-classical implementation of mapping Hamiltonian methods for general non-adiabatic problems, S. Bonella and D.F. Coker 268 (2001) 189
Electronic decoherence in condensed phases, D.M. Lockwood, H. Hwang and P.J. Rossky 268 (2001) 285
Inelastic resonant tunneling with wavepackets, F. Grossmann 268 (2001) 347

Energy transfer processes
Non-Markovian quantum state diffusion, J.T. Stockburger and H. Grabert 268 (2001) 249

Molecular photophysical processes
Modeling of ultrafast electron-transfer dynamics: multi-level Redfield theory and validity of approximations, D. Egorova, A. Kühl and W. Domcke 268 (2001) 105

Intramolecular dynamics
Retardation effects in the dynamics of open molecular systems, T. Mančal and V. May 268 (2001) 201

-radiationless transitions
Electronic decoherence in condensed phases, D.M. Lockwood, H. Hwang and P.J. Rossky 268 (2001) 285

Coherence loss processes
Iterative path integral calculation of quantum correlation functions for dissipative systems, J. Shao and N. Makri 268 (2001) 1
The real-time renormalization group approach for the spin-boson model in non-equilibrium, M. Keil and H. Schoeller 268 (2001) 11
From completely positive maps to the quantum Markovian semigroup master equation, D.A. Lidar, Z. Bihary and K.B. Whaley 268 (2001) 35
Energy gap dependence of vibrational dephasing rates in a bath: a semigroup description, D.M. Lockwood, M. Ratner and R. Kosloff 268 (2001) 55
Complete parameterization, and invariance, of diffusive quantum trajectories for Markovian open systems, H.M. Wiseman and L. Diósi 268 (2001) 91
Wiener–Hermite expansion formalism for the stochastic model of a driven quantum system, Y. Kayanuma and K.-i. Noba 268 (2001) 177
Retardation effects in the dynamics of open molecular systems, T. Mančal and V. May 268 (2001) 201
Non-Markovian homodyne-mediated feedback on a two-level atom: a quantum trajectory treatment, J. Wang, H.M. Wiseman and G.J. Milburn 268 (2001) 221
Non-Markovian quantum state diffusion, J.T. Stockburger and H. Grabert 268 (2001) 249
Mechanisms of decoherence at low temperatures, M. Dubé and P.C.E. Stamp 268 (2001) 257
Decoherence and dephasing in coupled Josephson-junction qubits, M. Governale, M. Grifoni and G. Schön 268 (2001) 273

Nonlinear responses (incl. optical)
On the Bayesian approach to calculating time correlation functions in quantum systems; reaction dynamics and spectroscopy, G. Krilov, E. Sim and B.J. Berne 268 (2001) 21
Dissipation in anharmonic molecular systems: beyond the linear coupling limit, M. Nest and P. Saalfrank 268 (2001) 65

Reactions (incl. dissociation)

-condensed phase
Subsystem dynamics in mixed quantum–classical systems, M. Toutounji and R. Kapral 268 (2001) 79
Semiclassical electron transfer: Zusman equations versus Langevin approach, I. Goychuk, L. Hartmann and P. Hänggi 268 (2001) 151

Tunneling
The real-time renormalization group approach for the spin-boson model in non-equilibrium, M. Keil and H. Schoeller 268 (2001) 11
Mechanisms of decoherence at low temperatures, M. Dubé and P.C.E. Stamp 268 (2001) 257
Decoherence and dephasing in coupled Josephson-junction qubits, M. Governale, M. Grifoni and G. Schön 268 (2001) 273
Quantum transition state theory for dissipative systems, J.-L. Liao and E. Pollak 268 (2001) 295
Steady-state quantum mechanics of thermally relaxing systems, D. Segal and A. Nitzan 268 (2001) 315
Inelastic resonant tunneling with wavepackets, F. Grossmann 268 (2001) 347

Electron transfer
Subsystem dynamics in mixed quantum–classical systems, M. Toutounji and R. Kapral 268 (2001) 79
Modeling of ultrafast electron-transfer dynamics: multi-level Redfield theory and validity of approximations, D. Egorova, A. Kühl and W. Domcke 268 (2001) 105

Perturbative treatment of intercenter coupling in the framework of Redfield theory, U. Kleinekathöfer, I. Kondov and M. Schreiber 268 (2001) 121
Electronic decoherence in condensed phases, D.M. Lockwood, H. Hwang and P.J. Rossky 268 (2001) 285
Steady-state quantum mechanics of thermally relaxing systems, D. Segal and A. Nitzan 268 (2001) 315

Proton and hydrogen atom transfer
Subsystem dynamics in mixed quantum–classical systems, M. Toutounji and R. Kapral 268 (2001) 79

Fluctuations and noise
From completely positive maps to the quantum Markovian semigroup master equation, D.A. Lidar, Z. Bihary and K.B. Whaley 268 (2001) 35
Bistability and stochastic resonance in an open quantum system, T. Wellens and A. Buchleitner 268 (2001) 131
Path-integral approach to a semiclassical stochastic description of quantum dissipative systems, J. Casado-Pascual, C. Denk, M. Morillo and R.I. Cukier 268 (2001) 165
The Brownian motion stochastic Schrödinger equation, W.T. Strunz 268 (2001) 237
Mechanisms of decoherence at low temperatures, M. Dubé and P.C.E. Stamp 268 (2001) 257
Decoherence and dephasing in coupled Josephson-junction qubits, M. Governale, M. Grifoni and G. Schön 268 (2001) 273
A uniqueness-theorem for "linear" thermal baths, P. Reimann 268 (2001) 337

Thermodynamic and transport properties
Steady-state quantum mechanics of thermally relaxing systems, D. Segal and A. Nitzan 268 (2001) 315
